

Conteh Home Services

Exists to provide a family like setting for individuals with mental and physical handicaps. Our mission is achieved by working in collaboration with area social service agencies and to provide our residents with skill development in daily living, social interaction, recreation, and transportation. Our mission is to encourage residents to enhance their vocational motivation and incorporate community activities in their lives. We achieve this by offering our resident's unique services such as skill development and self enrichment where the residents can participate in their care. Further, the residents are treated as adults and are encouraged to take responsibility for their actions and actively participate in their self determination.
